lelework1211@gmail.com | (917)767-2493 | [Portfolio: www. leleyang.com](https://www.leleyang.com) | UI/UX Designer

Education

Parsons School of Design, The New School

Master of Fine Arts in Design and Technology | GPA: 3.98/4.00

New York, NY

Sep. 2024 – Jun. 2026

Beijing Film Academy

Bachelor of Fine Arts in Digital Media Art | GPA: 3.48/4.00

Beijing, China

Aug. 2019 – Jul. 2023

Work Experience

Vortex Net

Covina, CA

UI/UX Designer — Data Visualization

Jun. 2025 – Oct. 2025

- Redesigned financial dashboards and spend-analysis experiences, translating complex and high-density financial data into clear information hierarchies, user flows, and responsive interfaces that made key insights easier to understand, compare, and navigate.
- Mapped end-to-end user flows and developed production-ready prototypes in Figma, defining interaction behaviors and edge cases including error, empty, and loading states to create more complete, predictable, and intuitive product experiences.
- Developed a lightweight Figma-based design system with reusable components, layout structures, and responsive interaction patterns, establishing greater visual and functional consistency across dashboard experiences while supporting scalable product development.
- Collaborated with product and data stakeholders to validate requirements and iterate on solutions through usability testing, stakeholder feedback, and data validation, reducing user errors and improving task success by 15%.

Mango TV

Changsha, China

UX / Narrative Design Intern

Feb. 2022 – Apr. 2022

- Designed mobile-first campaign experiences and editorial layouts, translating dense visual and narrative content into clearer information hierarchies, structured page flows, and more scannable mobile experiences.
- Conducted usability testing and A/B comparisons to evaluate readability, content hierarchy, and layout effectiveness, then applied findings to refine typography, spacing, and content presentation, improving readability by 20% and creating a more consistent mobile experience.
- Developed responsive typography and layout systems based on accessibility and mobile-first principles, creating more consistent visual patterns across screen sizes while maintaining clarity across different campaign content.

Movie Cheese Pie

Beijing, China

Visual & UX Design Intern

Oct. 2020 – Dec. 2020

- Transformed large volumes of film and editorial information into clear visualizations, including timelines, hierarchical diagrams, and structured information graphics, while establishing clear visual hierarchy and typography across digital content.
- Collaborated with editorial and social media teams to organize content, align visual direction, and deliver promotional and editorial assets across multiple publishing channels.

Project Experience

Last Message — Web-Based Interactive Investigation Experience | lastmessage.online | ChatGPT API, Codex, Claude Code, Figma

- Led the end-to-end UX/UI design of a web-based interactive experience, translating large volumes of evidence, character relationships, narrative data, and nonlinear investigation paths into a structured information architecture and intuitive user flows.
- Designed the visual language and interface system across evidence databases, investigation screens, and conversational interactions, then translated the UX/UI into a publicly accessible, fully functional web application with working navigation, interaction logic, AI-powered features, and a cohesive visual system across the complete investigation experience and multiple interconnected user pathways.
- Integrated the ChatGPT API to support dynamic NPC interactions and conducted 2 expert interviews and 8 remote usability tests, using findings to refine navigation, information discovery, and interaction logic.

Backstage — Offline Social Experience for Social Anxiety | sagbackstage.framer.website | Figma, Framer, Design System

- Designed an offline-first social experience for people with social anxiety, translating research with 55 participants into user flows and interaction strategies that reduce barriers to face-to-face connection.
- Established a complete design system before interface development, defining typography, color hierarchy, reusable components, interaction patterns, and layout rules that guided the end-to-end interface design and maintained consistency across the digital experience.
- Translated user needs into key features including activity invitations, calendar planning, profile-building interactions, and post-meetup feedback, developing a high-fidelity interactive experience that demonstrates the complete user journey.

Skills

Design: User Research, User Flows, Prototyping, Usability Testing, Interaction Design, Design Systems, Visual Design, Data Visualization

Tools: Figma, Framer, Adobe Creative Suite, Procreate, HTML/CSS/JavaScript, AI-Assisted Development
